

ListenPoint System Module Now Available on the Compass Control®

ListenPoint Classroom Amplification Systems are now compatible with the Compass Control® System, the first fully integrated major control system built from the ground up to use iOS & Android devices – as its backbone.

Key Digital has developed a driver and a pre-configured GUI template for their Compass Control® system to interface with ListenPoint Amplification Systems. Compass Control® system provides ListenPoint users with iOS/Android access to a complete classroom amplification system that allows students to improve speech intelligibility, comprehension, and retention, while having an integrated control system under their fingertips with additional video, lighting, climate, security, and automation controls.

Module Features:

- › Bi-Directional Control over RS-232
- › Microphone Audio Controls
- › Channel Audio Controls
- › Relay Control
- › Input and Page Status
